

Airpark Cahors

Maison example 1

This villa has a surface of nearly 140 m². The bungalow has a living room, kitchen, master bedroom en-suite with dressing and separated on the other side of the house three bedrooms, a bathroom and a study. On the outside you will find two covered terraces and a garage.

Like all other houses this villa will be insulated so that you can enjoy your home the whole year through. Due to the large windows it will be bright and enjoyable to live in.

The estimated total costs of a villa of this type will be € 450.000 including all taxes. This includes:

- The land (about 1500 m²)
- Outside works, connection to electricity, water and telephone line
- Swimming pool
- The villa as described above

The garage is suitable for extension and could be transferred into a hangar. We recommend to choose for a more spacious plot to realize the house plus hangar and connection to the taxiway.

Prices are an indication and depend on size and finishing.
